SUMMARY

Data Science and Machine Learning student with hands-on experience in building AI, Deep Learning, NLP, Recommendation Systems, and Data Analytics projects. Skilled in Python, Scikit-learn, TensorFlow, SQL, Power BI, and Streamlit, with practical experience in deploying ML applications and working with real-world datasets.

EDUCATION

B.Sc. in Computer Science (Data Science Major)

Helwan National University

10/2023 – 07/2027

Cairo, Egypt

Focused on Machine Learning, Data Analysis, AI, Statistics, and Software Engineering, with hands-on projects in NLP, Deep Learning, Dashboards, and Computer Vision.

SKILLS

Programming Languages

Python, SQL, Pandas, NumPy

Frameworks & Tools

Scikit-learn, TensorFlow, Streamlit, Power BI, Plotly
Dash, Hadoop MapReduce, GitHub

- Languages: Arabic, English.

Machine Learning & AI

Machine Learning, Deep Learning, NLP, Computer Vision, Recommendation Systems, Data Mining

Python & Data Analysis

Data Analysis, Data Visualization, ETL, Statistics, Clustering, Feature Engineering

- Soft Skills: Communication, collaboration, problem-solving, teamwork.

CERTIFICATES

Data Scientist in Python

DataCamp — 26 Hours — 2026

Deep Learning in Python

DataCamp — 18 Hours — 2026

Artificial Intelligence Training Program (90 Hours)

Information Technology Institute (ITI) — 2025

Getting Started with Deep Learning

NVIDIA — 2025

Intro to Deep Learning

Kaggle — 2025

Generative AI Tools

Microsoft & Care Egypt — 2025

COURSES

AI & Data Science Diploma

Instant Academy

01/2026 – Present

Cairo, Egypt

Currently enrolled in a 170-hour intensive AI & Data Science diploma covering Python, SQL, Data Analysis, Machine Learning, Deep Learning, NLP, Computer Vision, MLOps, and LLM applications. Working on real-world projects involving data preprocessing, model development, deployment, recommendation systems, and analytics using Scikit-learn, TensorFlow, Streamlit, Power BI, Hadoop, and Hugging Face tools.

PROJECTS

AI-Powered Fraud Detection for E-Commerce 🔗

Deep Learning | NLP | Computer Vision

Built a multi-model AI system for detecting fraudulent e-commerce products using NLP, Computer Vision, and Streamlit deployment.

Movie Recommendation System [↗](#)

Data Mining | Recommendation Systems

Developed a movie recommendation system using Data Mining, graph algorithms, and interactive Streamlit dashboards.

Customer Segmentation using KMeans & DBSCAN [↗](#)

Machine Learning | Clustering

Implemented customer segmentation models using clustering, PCA visualization, and behavioral analysis techniques.

Distributed Data Processing using Hadoop MapReduce [↗](#)

Big Data | Hadoop | MapReduce

Implemented Hadoop MapReduce applications for distributed analytics using joins, partitioning, and scalable data processing techniques.

Super Store Sales Analytics Dashboard [↗](#)

Power BI | Business Intelligence

Designed a Power BI dashboard for analyzing sales performance, KPIs, and customer trends.

Car Type Classification using CNNs [↗](#)

Deep Learning | Computer Vision

Developed a CNN-based image classification system for car type prediction with Streamlit deployment.

OTHER PROJECTS

- Online Course Engagement Analysis — github.com/loaymagdy38/Online-Course-Engagement-Analysis [↗](#)
- E-Commerce Sales Dashboard — github.com/loaymagdy38/ecommerce-sales-dashboard [↗](#)
- Gomoku AI using Minimax & Alpha-Beta Pruning — github.com/loaymagdy38/gomoku-ai-minimax-alphabeta [↗](#)
- Car Price Prediction Model — github.com/loaymagdy38/car-price-prediction-ml [↗](#)
